LC OPENING PAYMENTS ADVICE

OPENING VALUES	USD	RATES	ETB VALUE
FCY VALUE	40,600.00	160.0923	6,499,747.38
Opening Margin		30%	1,949,924.21
Bank Commission		4%	259,989.90
vat on bank Commisson		15%	38,998.48
swift charge (if available)	100.00	160.0923	30,592.07
vat on swift charge		15%	4,588.81
TOTAL OPENING DEBITED			2,284,093.47

check box

PAID

SETTELMENT AMOUNT REQUIRED / PAYABLE

	USD	RATES	ETB VALUE
FCY VALUE	40,600.00	161.2547	6,546,940.82
margin Held payable			1,949,924.21
SETTELEMENT AMOUNT %		70.0%	4,597,016.61
NBE 2.5 % RATE		2.50%	163,673.52
TOTAL SETTELMENT DEBIT			4,760,690.13
TOTAL AMOUNT PAYABLE			7,044,783.60

check box

PAID

For the Lc opening AND SETTLEMENT payments Advice (tabular list):

- The FCY value is taken automatically from the FOB value given as per the LC Currency selected. Example As in the image (\$ 40,600.00)
- Under the RATES ROW, currency rate is typed by the user and automatically calculate the ETB value by multiplying the FCY value with the given currency rate. Example As in the image (\$ 40,600.00 * 160.0923 = 6,499,747.38 ETB)
- The opening margin % is taken automatically from the margin opened % as in the form, and multiplies it automatically with the ETB amount of FCY value to get margin value in ETB. Example As in the image (6,499,747.38 * 30% = 1,949,924.21 ETB)
- Bank commission is automatically calculated in 4% from the total FCY value in ETB , no changes on it. Example As in the image (6,499,747.38 * 4% = 259,989.90 ETB).
- Vat on Bank commission is automatically calculated in 15% from the 4% bank commission value in ETB , no changes on it. Example As in the image (259,989.90 * 15% = 38,998.48 ETB).
- Swift charge (if available) is typed by the user in the USD ROW and currency rate is given by the user under the RATES ROW, and is automatically calculated by multiplying the value and the currency rate . Example As in the image (100 * 160.0923 = 30,592.07 ETB).
- Vat on Swift charge is automatically calculated in 15% from the swift charge ETB value (if available), Example As in the image (30,592.07 * 15% = 4,588.81 ETB).
- The Total Opening DEBITED value is the Total sum of ETB of opening margin + bank commission + vat on bank commission + swift charge(if available) + vat on swift charge. Example As in the image (1,949,924.21+ 259,989.90+ 38,998.48+30,592.07+4,588.81= 2,284,093.47 ETB).

AND FOR THE SETTLEMENT AMOUNT REQUIRED / PAYABLE (TABULAR LIST):

- The FCY value is taken automatically from the FOB value given as per the LC Currency selected. Example As in the image (\$ 40,600.00)
- Under the RATES ROW, currency rate is typed by the user and automatically calculate the ETB value by multiplying the FCY value with the given currency rate. Example As in the image (\$ 40,600.00 * 161.2547 = 6,546,940.82 ETB)
- Margin Held payable is automatically the amount of opening margin. Example As in the image (6,499,747.38 * 30% = 1,949,924.21 ETB).
- settlement amount % is automatically the rate of opening margin % deducted from 100% Example As in the image (100% - 30% = 70%) and the amount ETB is the ETB value of FCY value of the settlement amount required minus the margin Held payable (6,546,940.82 – 1,949,924.21 = 4,597,016.61 ETB)
- NBE 2.5% RATE is the 2.5% value of the ETB value of FCY value of the settlement amount required Example As in the image (6,546,940.82 * 2.5% = 163,673.52 ETB)
- The Total Settlement DEBITED value is the Total sum of ETB of settlement amount % + NBE 2.5% RATE amount. Example As in the image (4,597,016.61 + 163,673.52 = 4,760,690.13 ETB).
- The TOTAL AMOUNT PAYABLE VALUE ETB IS the sum of the total opening debited value + the total settlement debit value. Example As in the image (2,284,093.47 + 4,760,690.13 = 7,044,783.60 ETB)
- Then a check box indicating whether it is paid or unpaid, if paid, the total value changes to green color , if still not paid it remains in red color. This works for total opening debited value , for total settlement debit and also for total amount payable value.
