EXIMMAN

FOR ETHIOPIAN IMPORTERS & EXPORTERS

My Export & Import Manager app

One operating system for import and export trade.

LC managements · Customs · Logistics · Inventory · Purchases · Sales · Finance · FX

Product preview · v1.0

THE CHALLENGE

Trade is fragmented. Tools are not.

Ethiopian importers and exporters juggle banks, customs, freight forwarders, spreadsheets and WhatsApp threads — across different currencies and time zones.

Letters of Credit

Drafted in Word, tracked in email, signed off in person.

Customs & Duties

Tax assessments calculated by hand for every declaration.

Shipment Tracking

No single view from supplier to warehouse — only screenshots.

FX & Cash Flow

Bank rates change hourly; petty cash lives on paper.

THE SOLUTION

One workspace, front-to-back.

PROFIT Starts from work Efficiency and clear Decision makings.

EXIMMAN unifies every step of an import or export flow into a single, calm, role-aware integrated workspace — built for Ethiopian regulation and global trade systems.

12	**26**	**UCP 600**	**ETB · USD EUR · AED JPY · CNY**
Connected modules	Ethiopian banks tracked live	Compliant LC workflows	Native multi-currency

WHAT'S INSIDE

Twelve modules. One calm surface.

LC

Letters of Credit

UCP 600 ready. Draft, track, settle — with bank-by-bank logic.

CU

Customs Engine

CIF, duty, VAT, surtax and withholding — auto-calculated.

SH

Shipments

End-to-end tracking from supplier yard to your warehouse.

IN

Inventory

Post-clearance stock, warehouse utilization, reorder alerts.

CA

Cash Against Docs

Export-side payment instruments and NBE forex preview.

FN

Finance

Expenses, petty cash, payables and receivables in ETB.

FX

Exchange Rates

Live ETB rates from 26 banks, refreshed every five minutes.

AI

AI Insights

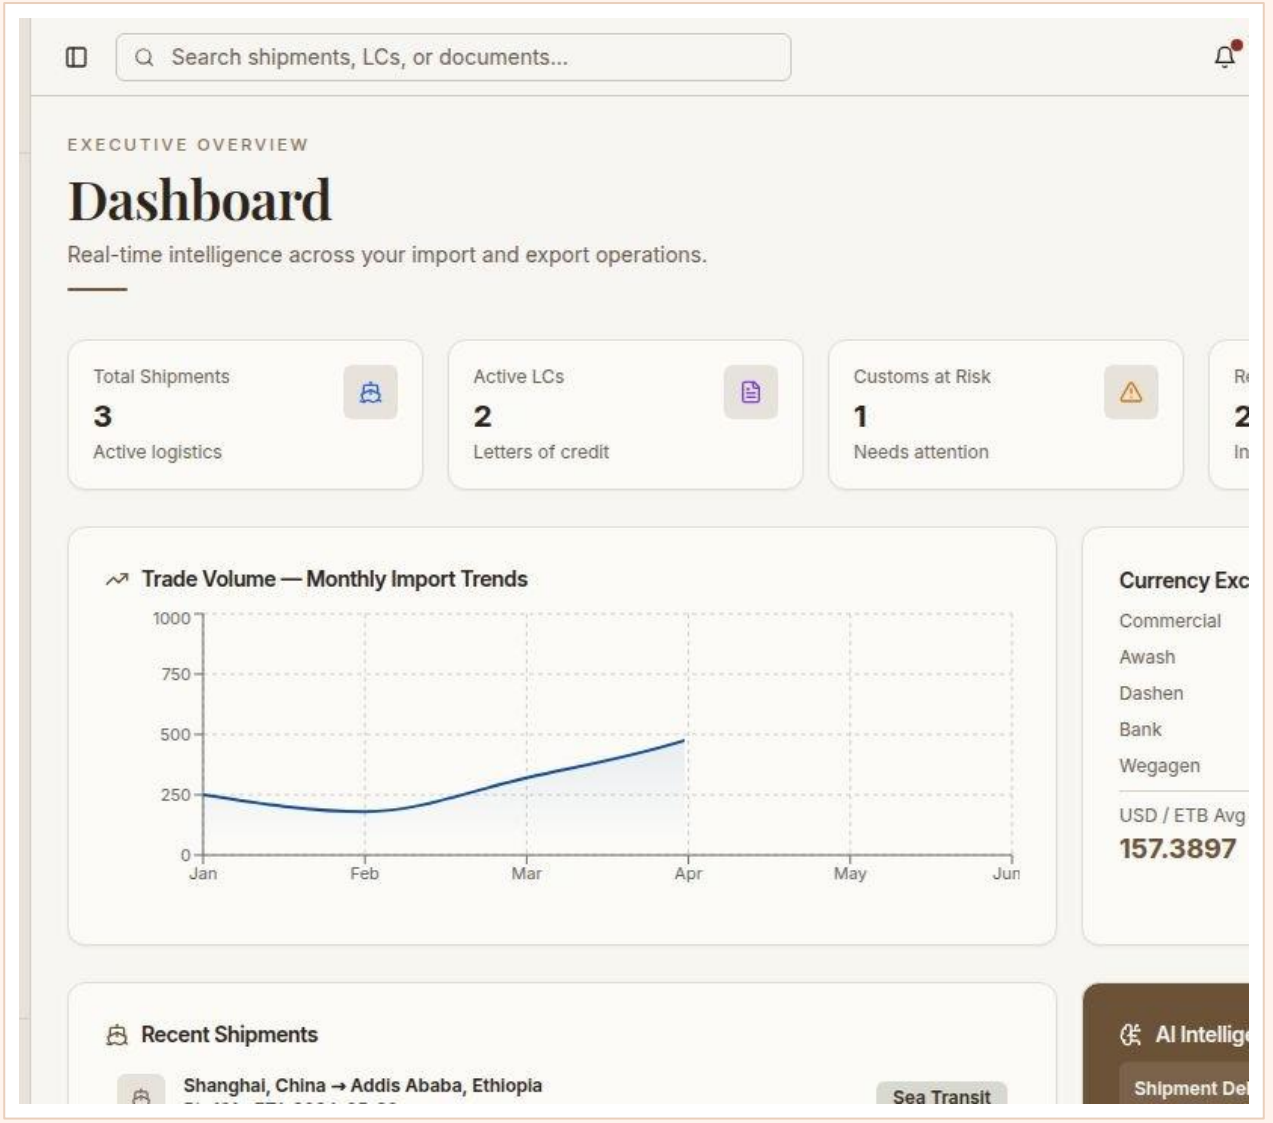

Risk scoring, FX hedging hints and shipment consolidation.

And more ….

Executive Dashboard

A real-time overview of every active LC, shipment, customs case and inventory line — built for daily review.

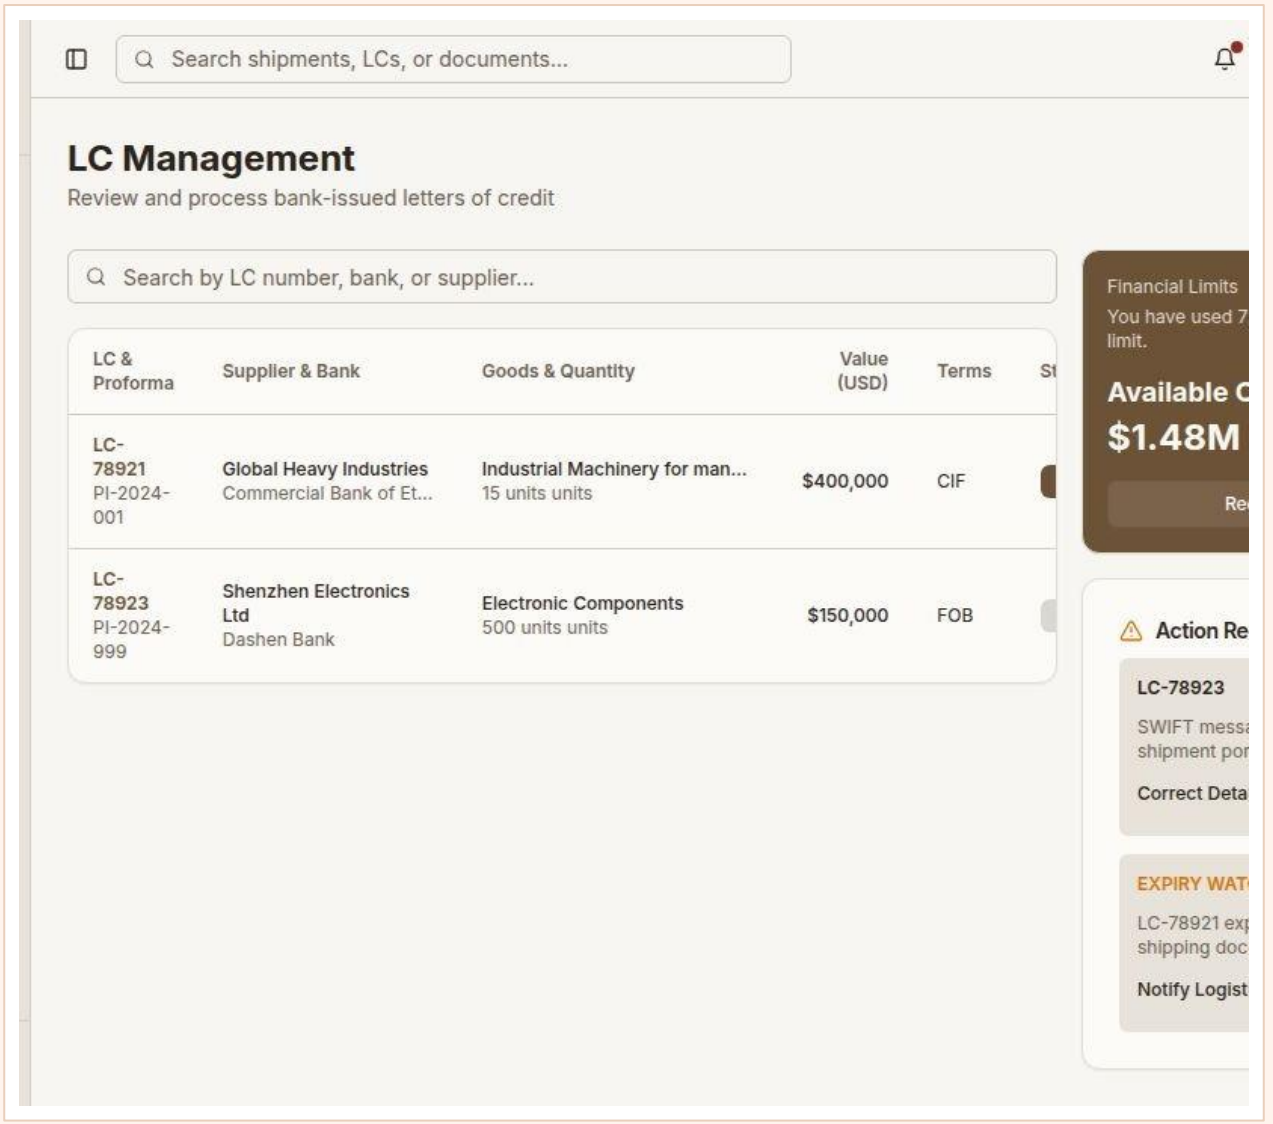

- Live KPI cards across the entire operation
- Monthly trade volume trend & FX averages
- Recent shipments and AI risk feed
- One-click report generation

Letters of Credit

Manage every bank-issued LC from draft to settlement — without leaving the platform.

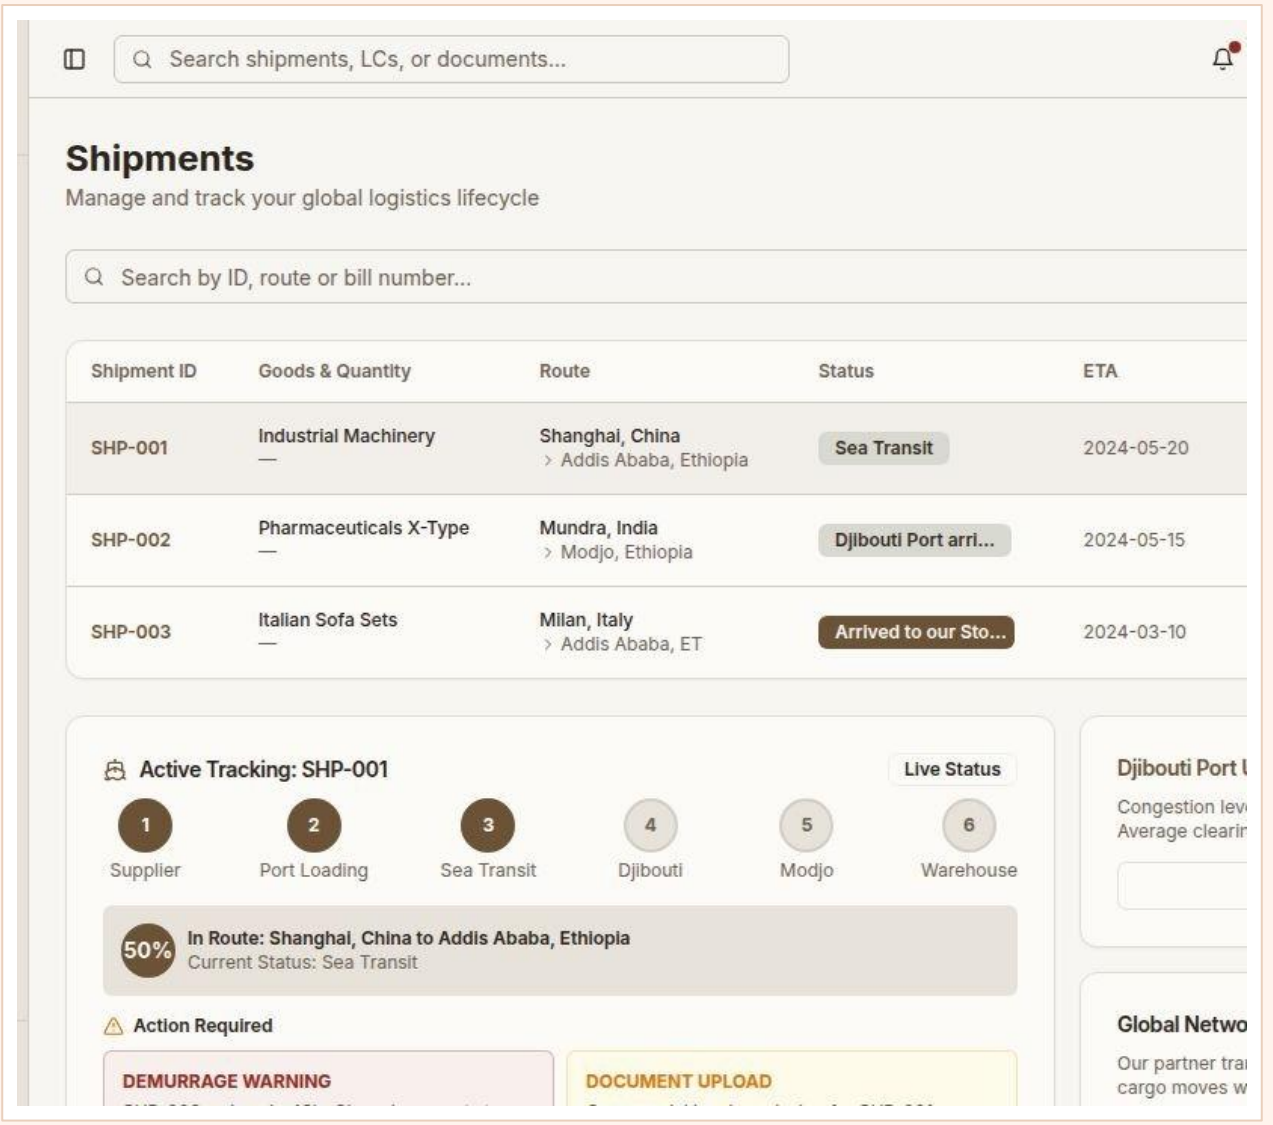

- Proforma, supplier, bank and Incoterms in one record
- Auto-calculated FOB + freight + insurance
- Partial shipment and transshipment logic
- Expiry watch and document checklist

Shipment Tracking

From supplier loading bay to your Addis warehouse — six-stage live tracking with port-level intelligence.

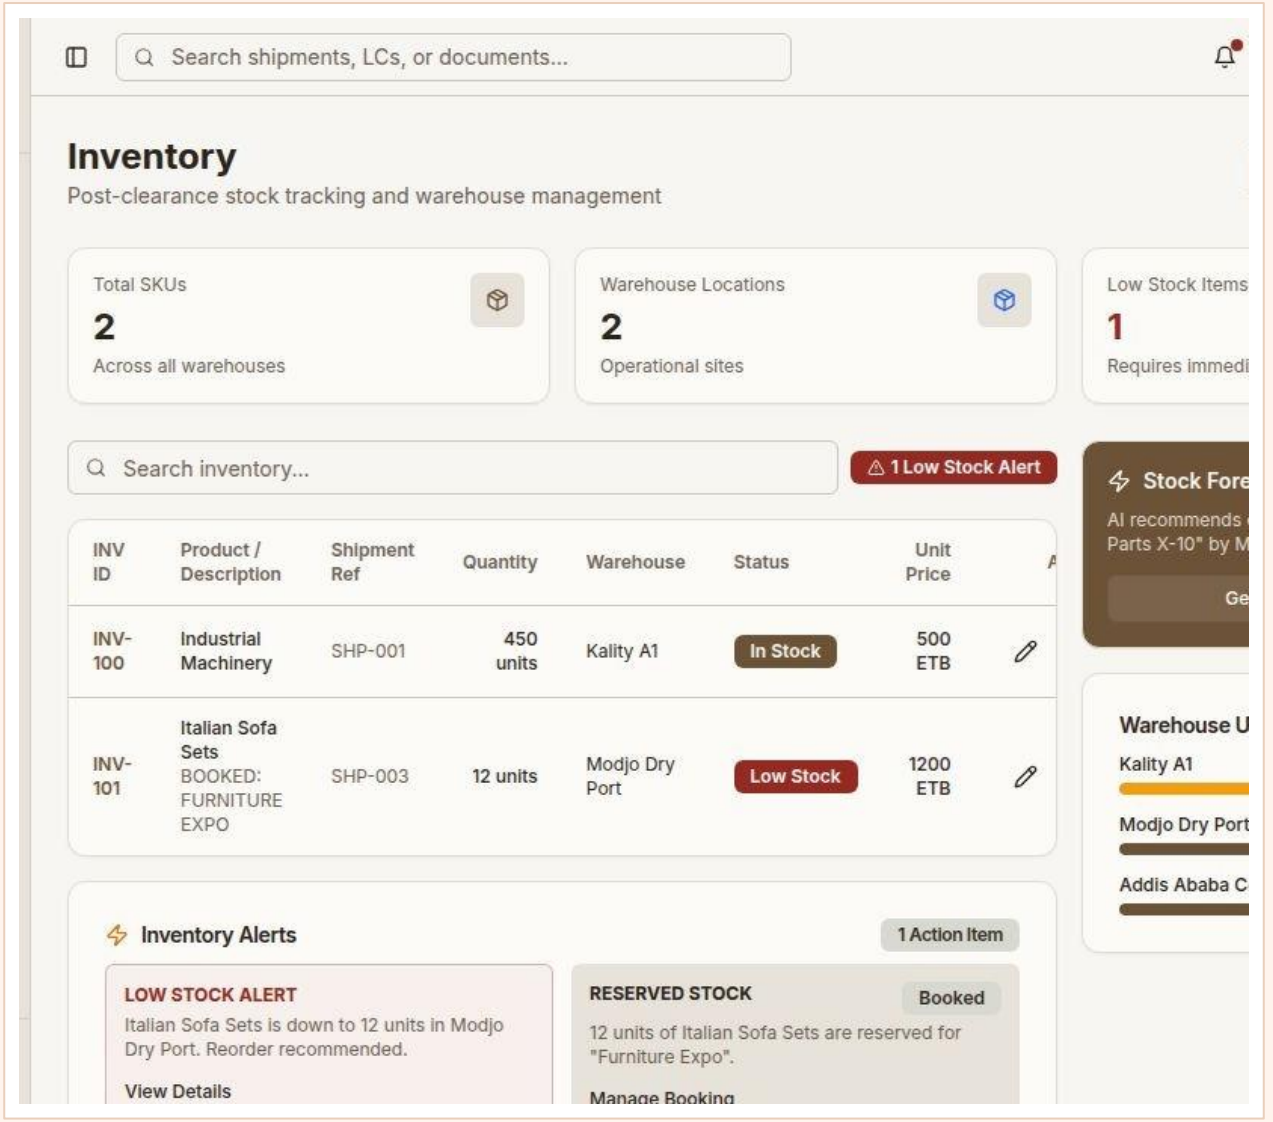

- Six-stage route progress per shipment
- Bill of lading and declaration numbers
- Djibouti port congestion updates
- Demurrage and document alerts

Inventory & Warehouse

Post-clearance stock, warehouse utilization and forecasting — kept honest by your shipment data.

- SKU-level stock across multiple warehouses
- Low-stock and reservation alerts
- Per-warehouse capacity utilization
- AI-suggested reorder plans

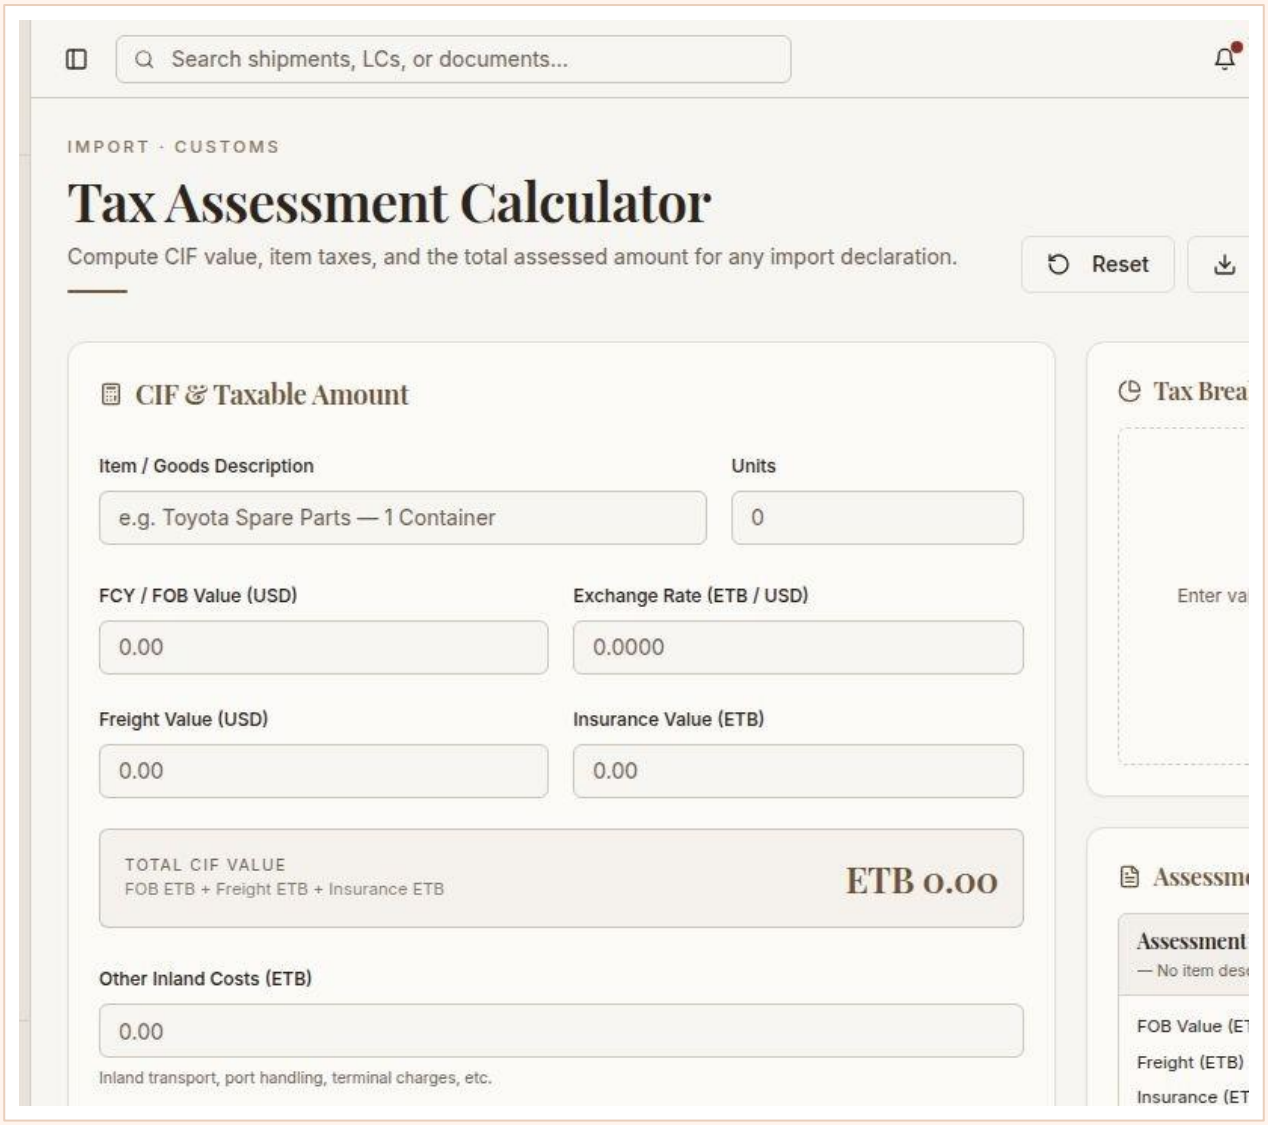

MODULE 05 · IMPORT

Customs & Tax Engine

Compute CIF, item taxes and the total assessed amount for any import declaration — print-ready notices included.

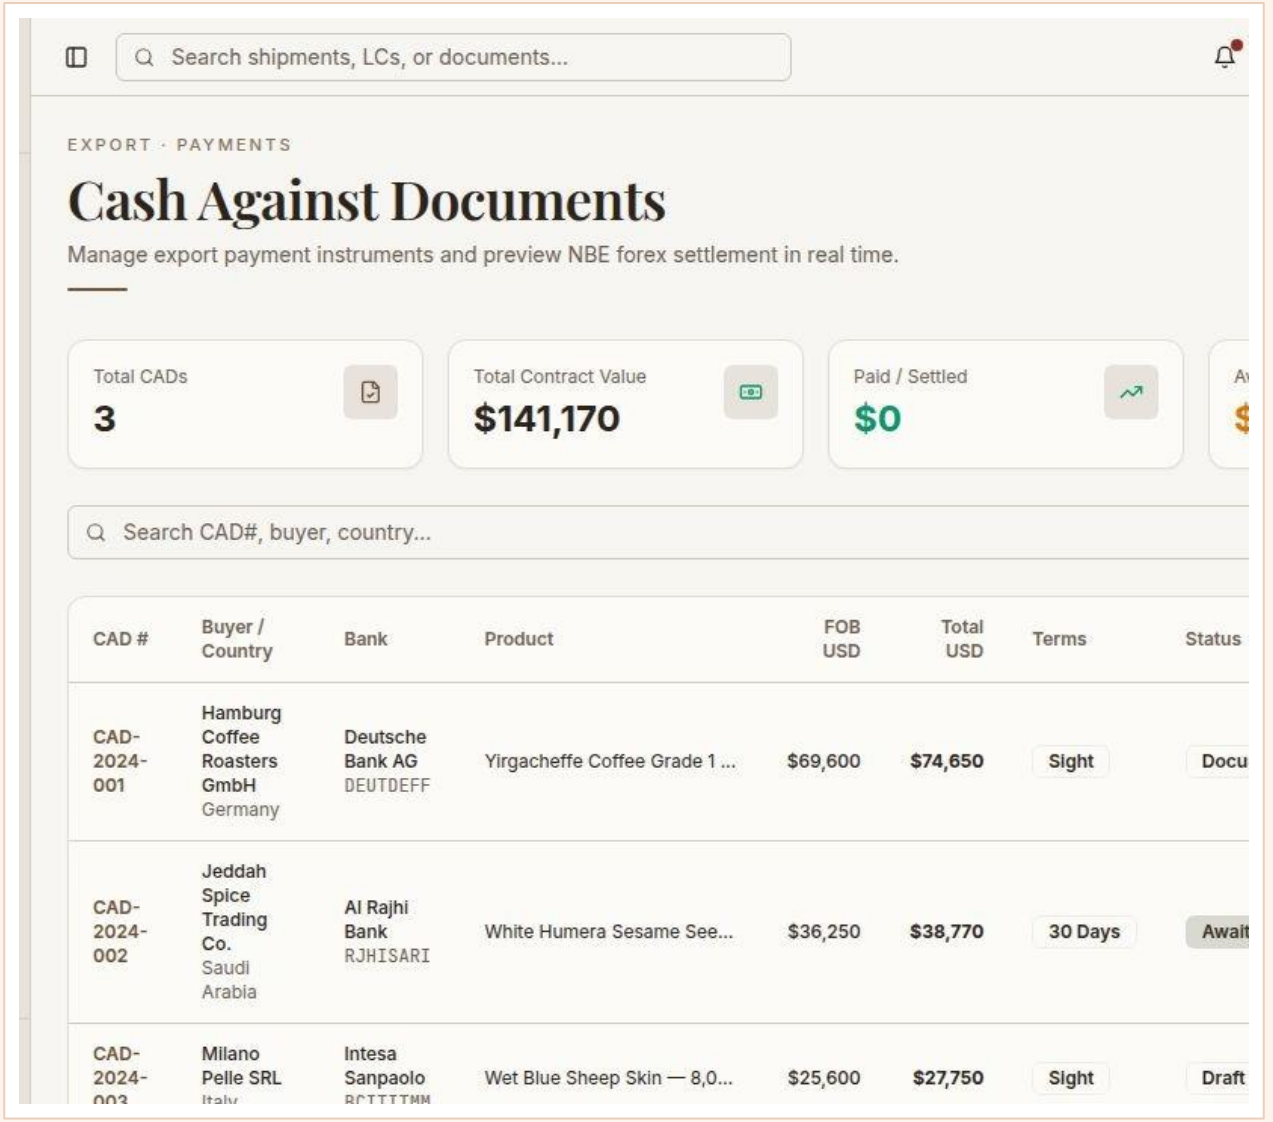

- CIF auto-build from FOB, freight, insurance
- Duty, VAT, surtax, withholding lines
- Inland costs and exchange-rate aware
- Save as PDF or print directly

Cash Against Documents

Manage outbound payment instruments and preview NBE forex settlement in real time.

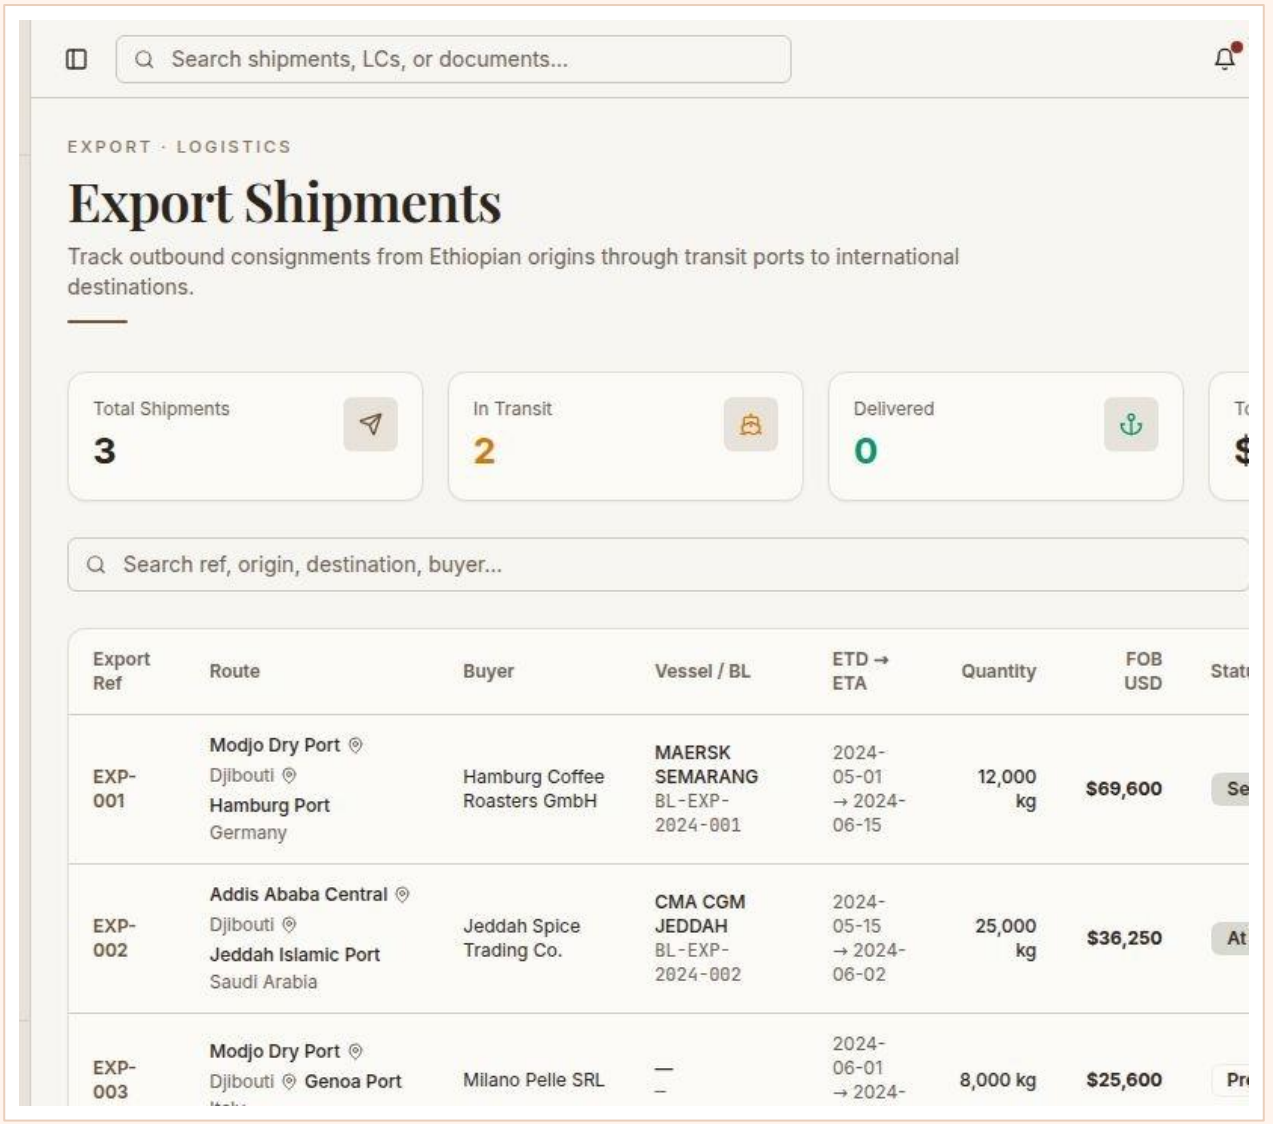

- CAD register with buyer, bank, terms
- Status flow: draft → sent → settled
- FOB and total contract value tracking
- Per-CAD product and document lineage

Export Shipments

Track outbound consignments from Ethiopian origins through transit ports to international destinations.

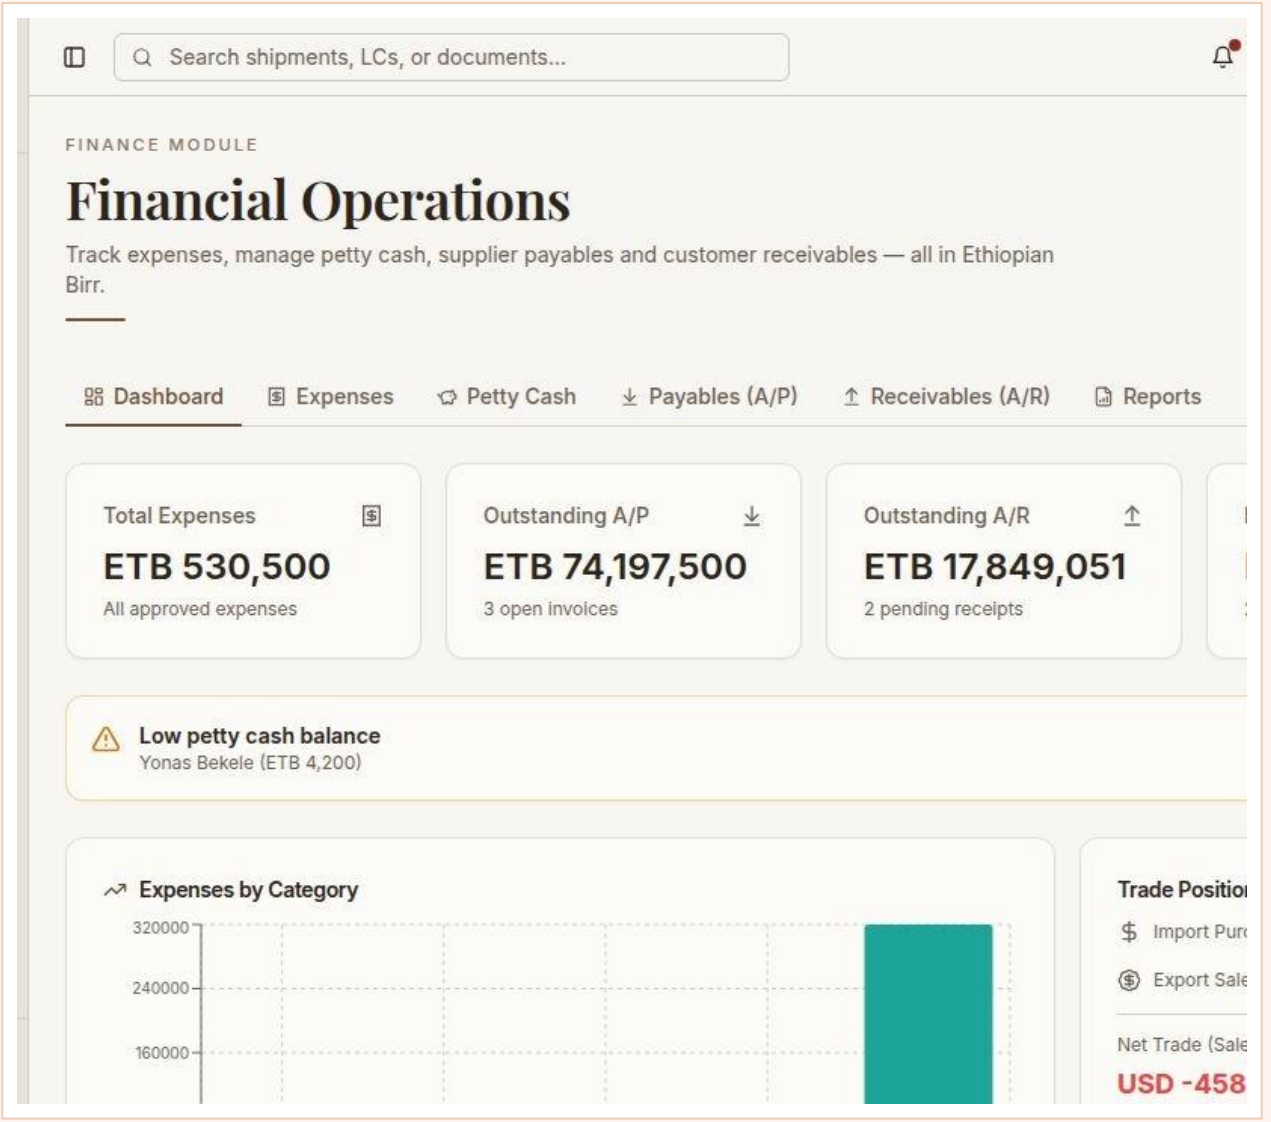

- Vessel, BL number, ETD and ETA
- Buyer, route and transit port view
- FOB value and weight per shipment
- Status from preparing to delivered

Financial Operations

Expenses, petty cash, supplier payables and customer receivables — all in Ethiopian Birr, all in one tab.

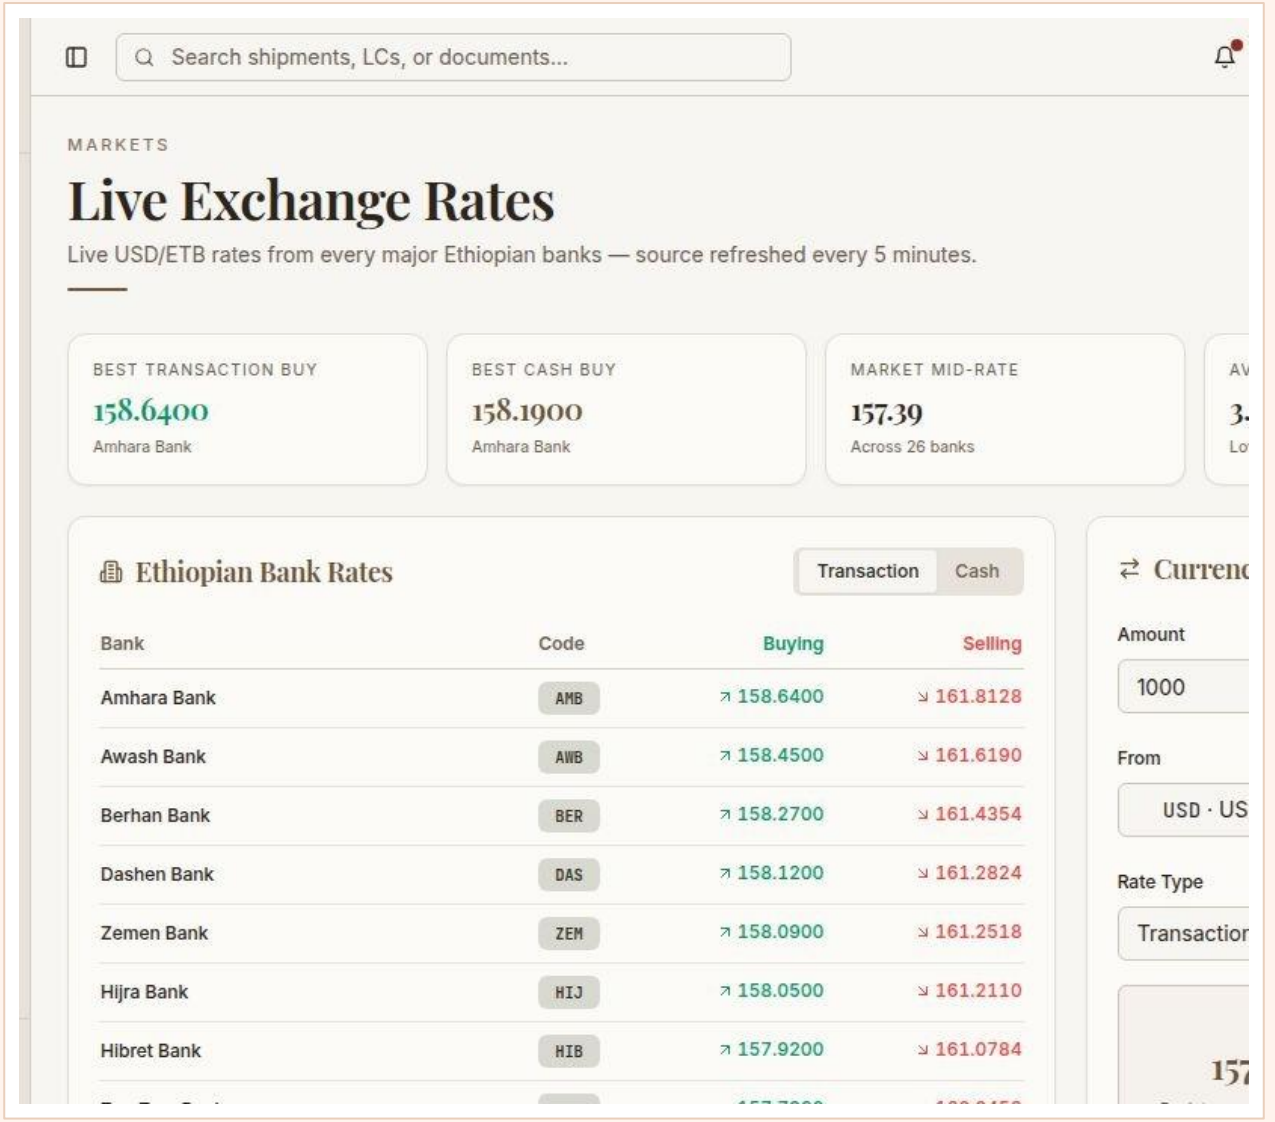

- Six tabs · dashboard to reports
- Low petty cash alerts and progress bars
- A/P and A/R with multi-currency
- Expense-by-category and trade-position charts

Live Exchange Rates

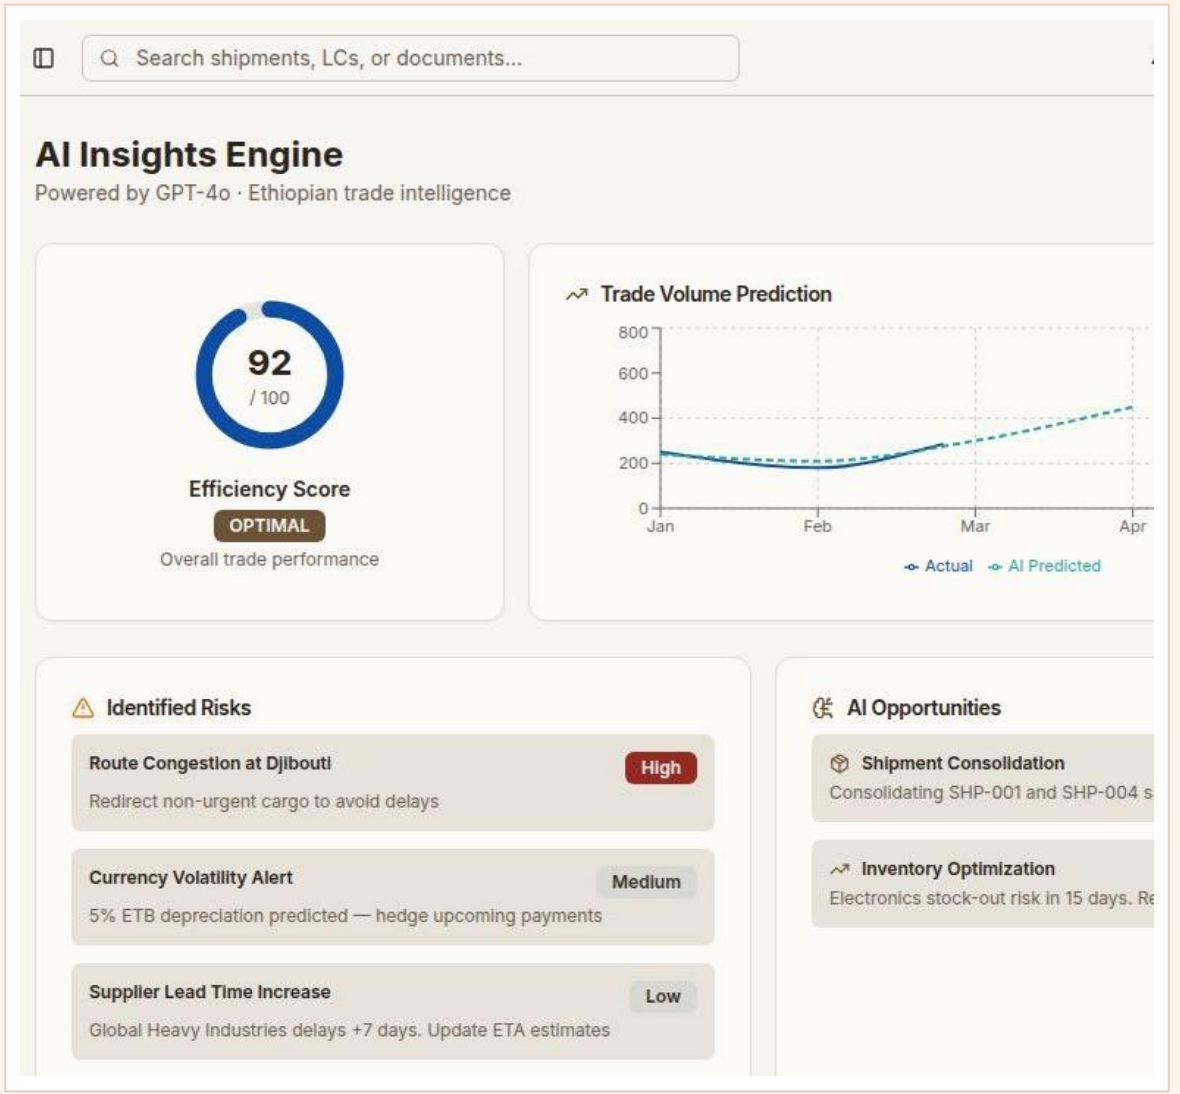

Live USD/ETB rates from every major Ethiopian bank — refreshed every five minutes with a built-in converter.

- Buy and sell rates from 26 banks
- Best transaction and cash buy spotlights
- Market mid-rate and average spread
- Currency converter for instant quotes

AI Insights Engine.

Risk scoring, FX hedging hints and shipment consolidation suggestions — powered by GPT-4o, tuned for Ethiopian trade context.

WHO IT'S FOR

Importers

- Open and settle LCs
- Customs & duty filing
- Inland logistics
- Inventory control

Exporters

- Sourcing & purchases
- CAD instruments
- Outbound shipments
- FX & receivables

Search shipments, LCs, or documents...

ABOUT EXIMMAN

Software built for the way Ethiopian businesses actually trade.

EXIMMAN is a software company founded by **Abdulkerim Mohammed**, engaged in building web and mobile applications for companies and organizations active in import and export, manufacturing, restaurants, and beyond.

Our software is tailored to the Ethiopian context — the way local banks issue Letters of Credit, the way customs duties and surtax are computed, the way ETB cash flows interact with foreign currency exposure — while staying fluent in international terminology such as Incoterms, UCP 600, HS classification and SWIFT messaging.

The result is a precise, dependable toolset that gives Ethiopian companies more clarity and ease of doing business, both locally and internationally.

WHO WE SERVE

- Import & Export Trading Houses
- Manufacturing Companies
- Coffee, Oilseed & Pulses Exporters
- Restaurants & Hospitality
- Logistics & Clearing Agents

AM

Abdulkerim Mohammed
FOUNDER, EXIMMAN

"Ethiopian businesses deserve software's and digital technologies that speaks their language — integrated both with local habits and global trade standards. EXIMMAN is our commitment to that bridge."
